

## Acknowledgment of Reviewers (2022)

We, the editors of Cancer Research Treatment (CRT), have strived toward the goal to make CRT a high quality journal. The CRT's impact factor of this year has risen to 5.036, which could not have been achieved without the peer reviewers' unselfish contribution of their valueless time and effort. Their thorough insights and constructive critiques have helped to maintain high standard of research articles published in CRT.

We owe a lot to the following peer reviewers during 2021 and 2022 and would acknowledge their enormous contribution with our most heartfelt appreciation.
