

S4 Fig. Kaplan-Meier survival curves according to the combined expression status of ligands and human epidermal growth factor receptor 4 (HER4). (A, B) Ligands and HER4 cytoplasmic expression. (C, D) Ligands and HER4 nuclear expression. (E, F) HER4 nuclear expression regardless of heparin binding epidermal growth factor–like growth factor (HBEGF) and betacellulin expression. HER4cyto, human epidermal growth factor receptor 4 cytoplasmic expression; HER4nu, human epidermal growth factor receptor 4 nuclear expression.
