

S1 Fig. Overall survival curve of patients with preoperative TNM under-staging and those with no TNM under-staging in the stratification. (A, B) Overall survival curve of patients

with preoperative TNM under-staging and those with no TNM under-staging in the age stratification. (C, D) Overall survival curve of patients with preoperative TNM under-staging and those with no TNM under-staging in the gastrectomy way stratification. (E, F) Overall survival curve of patients of preoperative TNM under-staging and those with no TNM under-staging in the lymph node noncompliance stratification. (G, H) Overall survival curve of patients with preoperative TNM under-staging and those with no TNM under-staging in the BMI stratification. (I-K) Overall survival curve of patients with preoperative TNM under-staging and those with no TNM under-staging in the tumor size stratification. (L-N) Overall survival curve of patients with preoperative TNM under-staging and those with no TNM under-staging in the Charlson score stratification.
