

S2 Table. Correlation of overall survival or progression-free survival with variables

Variable	Overall survival				Progression-free survival ^{a)}			
	Spearman		Pearson		Spearman		Pearson	
	R	Partial R	R	Partial R	R	Partial R	R	Partial R
Induction therapy regimen	0.66	0.09	0.65	-0.13	0.69	0.15	0.65	0.00
Duration of induction therapy	-0.23	0.06	-0.22	0.26	-0.23	-0.03	-0.11	0.28
Maintenance therapy regimen	0.46	0.42	0.43	0.43	0.65	0.82	0.73	0.84
Oxaliplatin reintroduction rate	0.42	0.15	0.51	0.26	-	-	-	-
Maintenance therapy rate ^{b)}	0.72	0.45	0.77	0.56	0.71	0.67	0.65	0.68
Trial year ^{b)}	0.56	0.34	0.60	0.32	-	-	-	-

R, correlation coefficient. ^{a)}For 18 treatment arms recommended to continue the maintenance therapy until disease progression, ^{b)}Maintenance therapy rate for overall survival and progression-free survival and trial start year for overall survival were additionally adjusted in the partial correlation analysis.
